SMC SHOWER TRAYS

Remove Watermark Now

PDF Compressor Free Version

The SMC is a special glass fiber reinforced, smooth texture polyester sheet, which is pressed under high temperature, polymerized into the appropriate form of compressed elements to give it its final form and unmatched features.
This manufacturing process has been well established in other industries (aerospace, mechanical engineering, automotive industry), though the sanitary market has just recently discovered and started to perceive the benefits of it over previously used materials and technologies.

SMC shower trays' durability, quality is constant, thanks to the impregnated fiber reinforcement, but weights half as much as cast marble tray with similar characteristics. The ribs at the back side of the tray strengthen the structure of the shower, while its weight is only slightly increased.

The soft material makes high-formatting possible, so the sharp corner shower SMC has a much more aesthetic look than its acrylic counterparts.

PDF Compressor Free version

The shower tray made of SMC material is high impact resistant, has a large compressive, flexural and tensile strength, does not crack, its temperature stability is odd (non-thermal expansion), chemical resistant, has a good thermal insulation capacity, easy to clean and, of course, waterproof.

In case of flat shower tray, recessed preparation is necessary for the siphon.
For more details ask our retailers.

Rimless

RIMLESS TOILETTES

The most important property of the rimless toilettes is that there are no unattainable nooks and corners, therefore it is easy to keep it clean. *Precisely designed shape* – „The specially designed toilet bowl enables the water to clean the whole internal surface completely , without splashing".

Quick Release

QUICK RELEASE

The Wellis seats are manufactured in the Quick release fashion. This solution provides easy installation, and facilitates the cleaning process too, because there's no need to remove the bolts, the seat can be removed with a single movement, and installed again the same way.

Hidden fastening

HIDDEN FASTENING

The wall-mounted and the floor mount Wellis toilettes are supplied with hidden fastening. There is only one tiny fastening point. This makes the cleaning easier and more hygienic.

Soft Close

SOFT CLOSE

The seat has a catch mechanism, which closes the cover softly, without external force, as excepted nowadays. We make no compromise in this, and therefore all of our seats are made with this technology.

Slim Seat

SLIM SEAT

The seats perfectly fit to the corresponding bowl. The Clement collection's Slim seat provides an elegant look.

Dual Flush 4/6 l

DUAL FLUSH 4/6

The one-piece toilettes are all dual flush, with 4 or 6 litres, respectively.

EUROPEAN PRODUCT, EUROPEAN QUALITY, 21ST CENTURY TECHNOLOGY

PDF Compressor Free Version

Since the company was founded in 2003, more and more people have chosen Wellis products, not only in our home country, but throughout Europe. With the pursuit for a healthy lifestyle, the demand for quality wellness products is growing.

Thanks to continuous growth and development, Wellis Magyarország Zrt. is now the largest hot tub manufacturer in Europe. As a domestic producer, it is the market leader amongst the wellness equipment manufacturers and distributors of Hungary.

Pools and spas are manufactured in two separate departments, in an area of altogether 18.000 square meters (approximately 190.000 square feet), with the involvement of 400 people. Owing to the significant capacity growth, every year 20.000 families can enjoy wellness experience provided by Hungarian-made spas and sanitaryware! Every developing company's history has some major milestones.

For Wellis, the latest of these came only a few months ago: in December 2015 we opened a 10.000-square meters (approximately 110.000 square feet) large production hall. The construction of the building complex equipped with enormous, cutting edge manufacturing tools was motivated by the growing demand of the market and the pursuit of quality manufacturing technology.

CHOOSE A PRODUCT WITH POLI-MAX™ REINFORCEMENT

For Wellis products, we use a special acrylic polyurethane foam to strengthen the shower and whirlpool body. It is applied in 3 layers for a perfect dimensional stability. We manufacture products with excellent features that will serve you for many years.

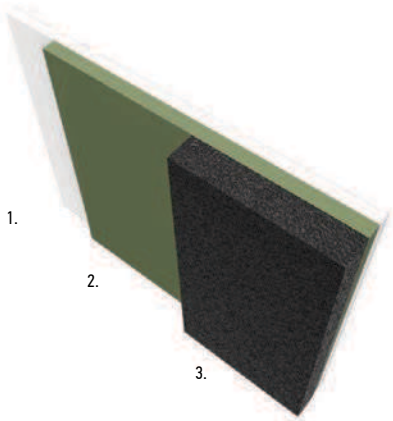
pdfelement

ADVANTAGES OF BATHTUBS WITH POLI-MAX™ REINFORCEMENT

The extraordinary thermal insulation capability increases the comfort in the bath or hot tub - without need to refill hot water - offers pleasant relaxation time while saving energy. It has an excellent sound insulation, which substantially reduces the amount of noises produced by the product walls. This means your neighbor won't get disturbed if you feel like having a refreshing massage in the middle of the night.

With your purchase you will support the environmental protection because in contrast to the fiber optic technology resulting from the PU processing, no harmful emissions are created. The resultant products have longer service life. Thanks to the advanced technology and high quality raw materials used, our products comply with all EU standards.

1. 4-5 mm outer layer made of acrylic with antibacterial surface treatment
2. ABS polymer layer which increases the strength and impact resistance of the acrylic layer
3. Polyurethane layer with medium density, which is applied with robot technology in two layers and thereby provides extraordinary thermal and acoustic insulation



FINISHED WITH NANOTECHNOLOGY

Our nanotechnology treated surfaces preserve their outstanding properties for many years due to the so-called lotus effect.
This option can be used for all of our massage whirlpools, hydro-massage baths and massage cabins. Because of the surface treatment with nanotechnology, the daily chemical cleaning can be accomplished far more quickly - you will need up to 80% less chemicals for the same result.

WELLIS HYDROMASSAGE SYSTEM

PDF Compressor Free Version

Choose individual massage system for your whirlpool.

When designing WELLIS massage systems, we were strived to create a wide product portfolio ranging from simple to modern, for example a hydro massage system equipped with television. We are committed to offer everyone the right system, which provides the maximum comfort in everyday life. Our massage systems can be installed in any tub type of your choice. So you just have to decide which system fits your needs and your home the best.

ELECTRONICALLY CONTROLLED MASSAGE SYSTEMS

E-PLUS™ -FEEL THE UNIQUE HYDRO MASSAGE EXPERIENCE!

The WELLIS E-PLUS™ massage system ensures that the time spent in the tub helps you fully relax. The controls let you incredibly easily regulate the built-in functions and select the tub lighting to enjoy the beneficial effects of different colors. The drying system dries up the whole pipe system and thereby prevents the formation of algae and bacterial growth.

• Touchscreen Computer • digital hydro massage and whirlpool system • air control • Chromotherapy lighting • Drying system • Water level sensor • Security lock

OPTION: Exclusive chromotherapy lighting: 12 LED lights on the side of the tub

E-DRIVE™ TOUCH - EASY TO OPERATE, USE, LOVE!

With the digital display, the control of tubs equipped with the WELLIS E-Drive™ TOUCH Massage System is very easy: you just simply lay in the tub and choose the function that will facilitate your relaxation. For perfect cleanliness of the water, a built-in ozone generator enriches your water with ozone. Optionally, you can equip your tub with a water temperature control system through which your tub doesn't have to be constantly refilled with hot water.

• LCD Computer • Digitally controlled hydro massage and whirlpool system • air control • Chromotherapy lighting • Drying system • Disinfection with ozone • Water level sensor • Security lock

OPTION: Thermostat • Exclusive chromotherapy lighting: 12 LED lights on the side of the tub

E-MAX™ TOUCH - DISCOVER ALL ASPECTS OF A PERFECT BATH!

In tubs equipped with WELLIS E-Max ™ Touch Massage System, we have installed features that help you completely unwind and relax in the tub. The positive effect of chromotherapy lighting can be felt most intensely in these models, since here the central lighting is supplemented by 12 small lamps on the side of the tub. Best of all, you can play your favorite music while relaxing your body with the aid of a massage!

• digital LCD display • digitally controlled hydro massage and whirlpool system • air control • Water level sensor • Chromotherapy lighting • ozone generator • Security lock • Thermostat • Drying system • FM radio and CD port • Exclusive chromotherapy lighting: 12 LED lights on the side of the tub

WELLIS V-CONCEPT™ BACK MASSAGE SYSTEM

PDF Compressor Free Version

The peculiarity of the WELLIS V-Concept back massage system, which was developed in cooperation with massage therapists and engineers, is the size and arrangement of the jets. Previous models had a common or two large jets and the water jet was aimed directly at the spine. In contrast, the smaller jets of the WELLIS V-Concept model massage the muscles of the back side of the spine because of their arrangement, resulting in a fast and beneficial relaxing effect.

WELLIS SLIM JETS

The new SLIM WELLIS jet and the suction protrude only 1.5 mm from the tub and thus guarantees a pleasant bath. Thanks to the unique design, the tubs equipped with hydro massage system towers offer outstanding convenience and design.

SILENT™ HOT AIR BLOWER

The warm air bubbles massage your skin gently combined with a pleasant effervescent effect. Its other big advantage is that this slows the cooling of the water. With the Silent™ engine, we have reduced the noise level of our whirlpool motor with hot air.

OXYGEN THERAPY™ - NATURAL DEEP CLEANSING AND HYDRATION

PDF Compressor Free Version

The Oxygen Therapy™ increases the oxygen content of the water to more than 70%. At the same time, it provides oxygen for a better metabolism, provides the skin with moisture, promoting the growth of skin cells and soften wrinkles, crow's feet, scars and skin defects.

OXYGEN THERAPY ™ FOR TIMELESS BEAUTY

- Millions of oxygenated microbubbles cover your body like silk
- Moisturizes and cleanses simultaneously
- The microbubbles penetrate deeply into the skin and clean the pores
- Supports and hydrates the skin
- Reduces crow's feet and wrinkles

THE OXYGEN-RICH BATH IS GOOD FOR YOUR HEALTH

- Increases the oxygen content of the water to more than 70%
- Stimulates collagen production

THE POSITIVE EFFECT OF NEGATIVE CHARGED IONS

- Increases the serotonin level
- Neutralizes free radicals
- Calms the soul and the body

CHOOSE THE OXYGEN THERAPY ™ SYSTEM AS AN OPTION FOR YOUR NEW TUB!

10 YEAR WARRANTY ON THE TUB BODY

The 10-year warranty conditions are the following: maintenance and cleaning should not be performed with mechanical abrasive (eg. Scouring powder) or corrosive chemicals. The manufacturer is not liable for any damages due to improper cleaning. The 10-year warranty is also in the usage of the Wellis leg structure and following the instructions for proper installation. Boring the tub body by the customer results in the loss of warranty. The warranty does not apply to promotional or showroom models.

WELLISCOLOR™ CHROMOTHERAPY

PDF Compressor Free Version

Colors can affect our moods and emotions, which in turn have an effect on our bodies. The control units of the tubs change colors independently or you can select a button from the color that best fits your mood.

EXCLUSIVE CHROMOTHERAPY

Direct underwater lights at the side of the tub consisting of 12 LED bulbs glow in accordance with the built-in Chromotherapy lighting of the tub. The exclusive chromotherapy lighting can be ordered as an option to the E-Plus™ and E-Drive ™ TOUCH massage systems and is standard in the WELLIS-Tub with E-Max™ TOUCH massage systems.

FAUCET SETS

PDF Compressor Free Version

5 years GUARANTEE

Select one of our faucet sets for your tub: From retro to modern - there is the right kit for everyone. A huge advantage of our faucet sets is that they are built directly into the tub and therefore wall and tile work costs can be avoided.The set includes: cold, warm, mixing valve, inlet and a showerhead.
We provide a 5-year warranty for our faucet collections (Rundo, Asti, Cosmo, Bellini collections, Fizz, Spring).

Wellis®

The products in this catalog are provided for illustrative purposes only and do not always conform to the product specifications advertised. Wellis reserves the right to modify the products without prior notice, including product offerings as they are valid at the time of printing. We will not be liable for any printing mistakes. The catalog contains gross (VAT) prices. In case of exchange rate changes, our prices may change with the rate of increase of the rate that can be automatically enforced when completing the scheduled payment of the order! The prices quoted in the catalog are valid until revocation or until the newel catalog is published.
